

ENCIRCLED

ENCIRCLED audio solutions GmbH is the new source and the official licensee of the IOSONO™ technology from Barco™

Effective from October 2019 all IOSONO related products are available as sub-licensed software solutions through the ENCIRCLED company. Our software solutions include:

- IOSONO inside – the fully featured and patented rendering software
- Spatial Audio Workstation – the content production tool
- Render+ – the object-based upmix tool within IOSONO inside

ENCIRCLED looks beyond the use of IOSONO as it stands today. To that extend we:

- ensure fully integrated rendering software into spatial audio processing hardware through our selected partner network worldwide
- continuously improve the software with our development partner (Barco) to maintain its trusted stability and add new features

ENCIRCLED provides extended service capabilities for all spatial audio topics and those who are involved in immersive entertainment.
